# *Who we are*

TURKEL has been established in 1985 by Turkel family in the capital of apricot, Malatya. By aiming at greater quality of service and making customer satisfaction its very first priority since the time of establishment, the company has progressively increased its product range and market share, became one of the most prominent and well-respected firms in the sector.

From various assortments of dried apricots to dried figs as well as sultana raisins and nuts, Turkel has been exporting its products to a wide range of countries all around the world. Operating in two facilities, our annual production capacity for dried apricots is around 4.000 tons and for dried fig is around 2000 tons. We give optimum care for every step of processing and packing with high quality equipment and experienced workers in our modern production sites, certified by BRC, ISO and Kosher.

With 38 years of invaluable experience in the sector, Turkel has dedicated itself to provide the best quality products and offer reasonable prices in order to meet our customers' expectations and make them pleased with our company and products.

*Natural Malatya Apricots*

*Dried Figs*

*Sultana Raisins*

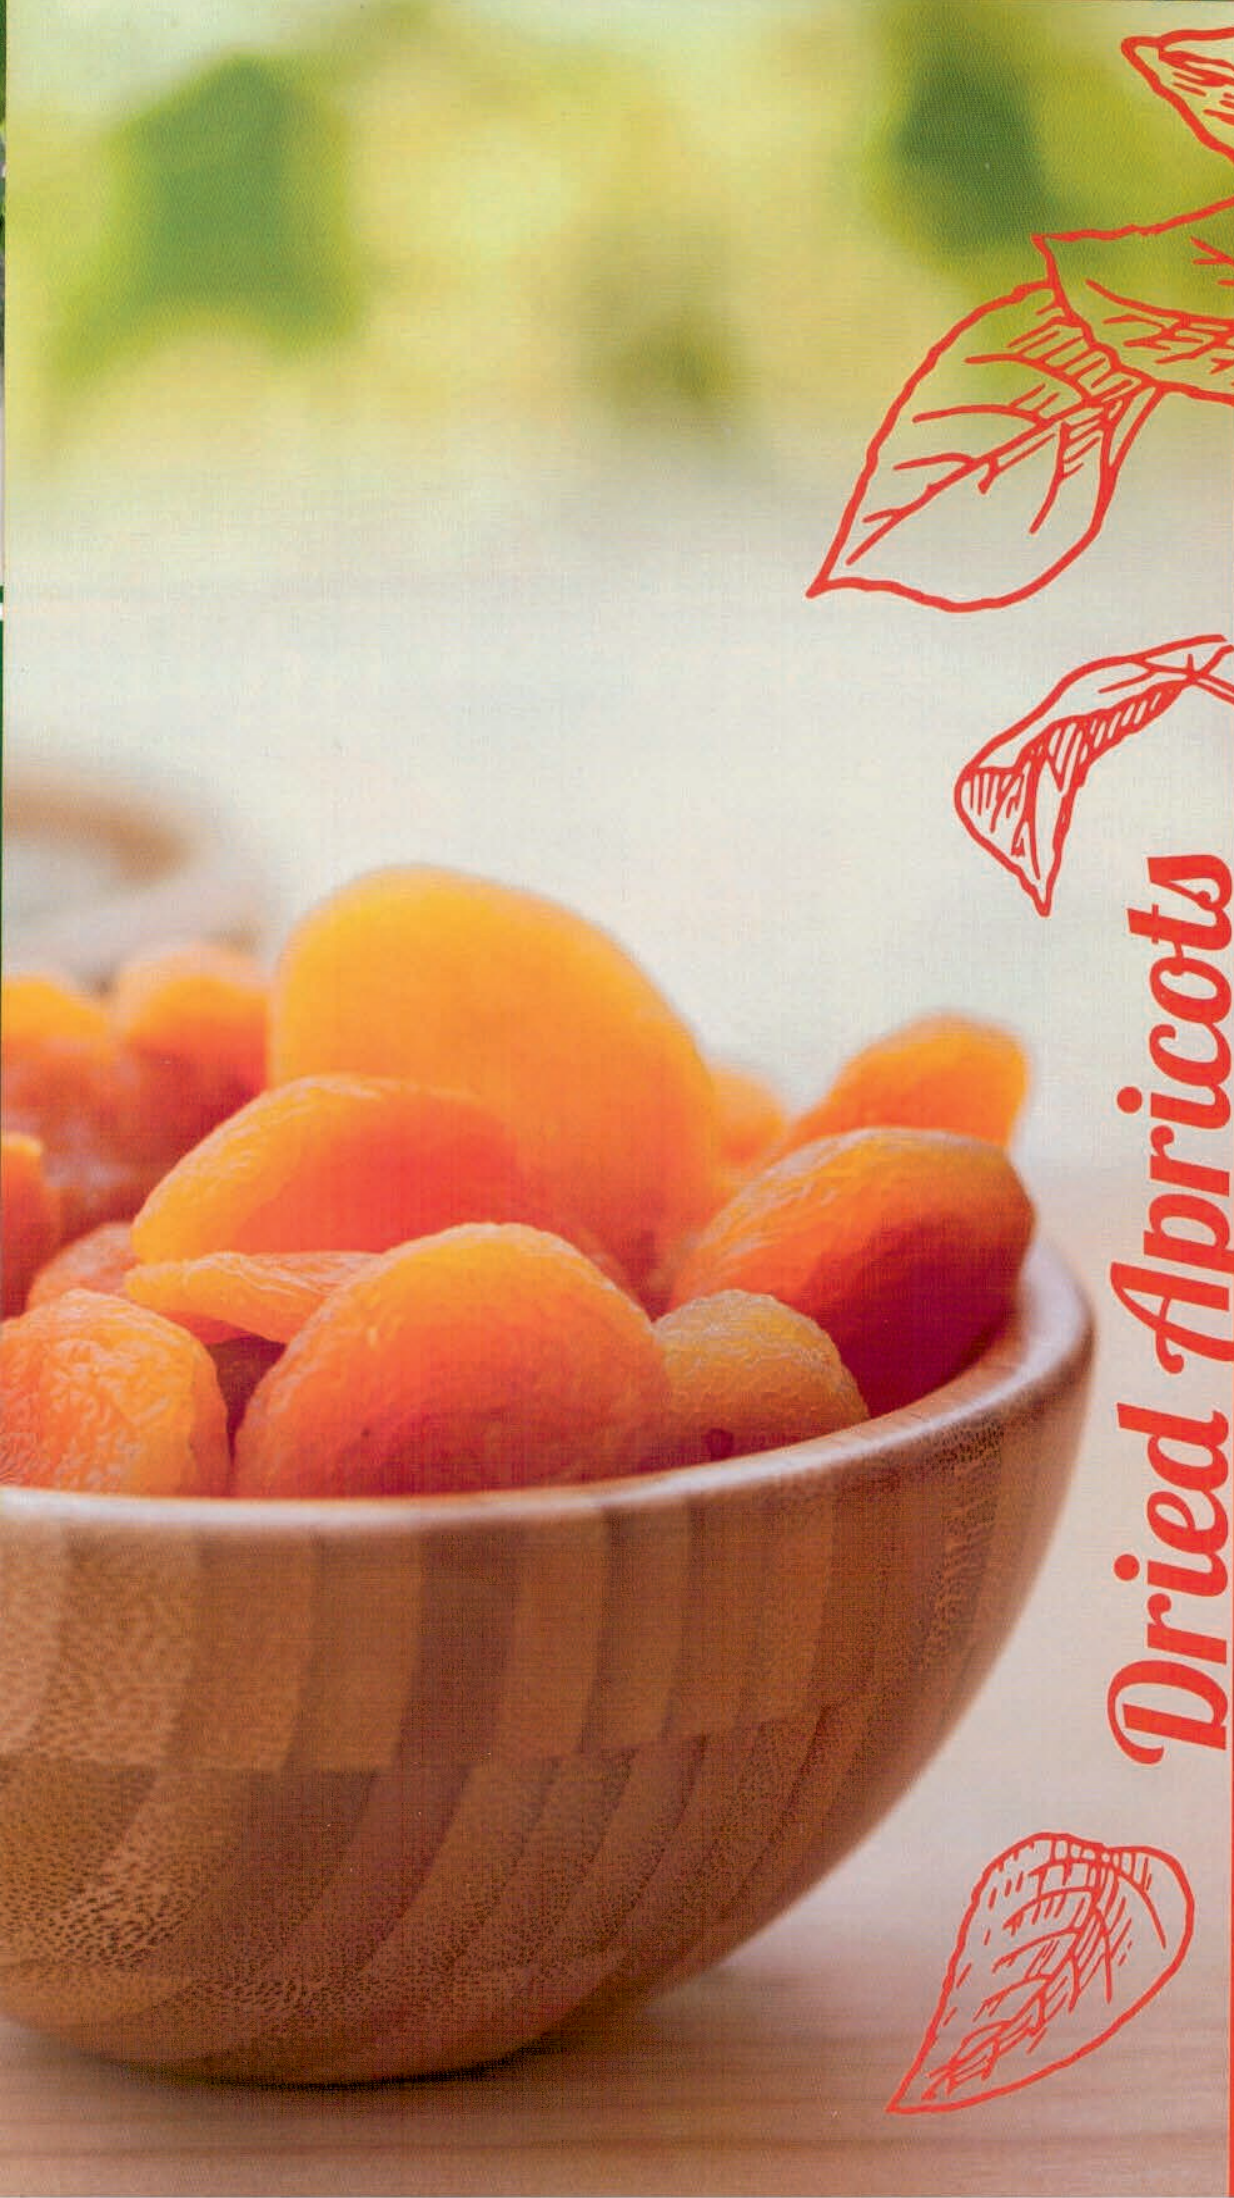

*Pistachios*

*Apricot Kernels*

*Dried Apricots*

*Processing*

#### WASHING

Raw apricots go through two stages of mechanised washing under hygienic conditions.

#### SIZING

Washed apricots are calibrated mechanically.

#### SELECTION

Washed and calibrated apricots are hand-selected to remove any foreign material.

Colour and appearance are carefully checked and any defects are removed individually.

#### FINAL SELECTION

A second hand-selection process helps to ensure that the finished products meet Turkel's high quality standards.

#### PACKING

Finished products are carefully packed in different package types, according to customers' needs.

Onsite laboratory testing measures moisture and sulphur content.

*Dried Figs*

*Processing*

### FUMIGATION

Figs are firstly fumigated under the control of a food engineer during at least 24 hours against the harmful pests.

### WASHING

After fumigation, figs are mechanically washed and cleaned by salty water under hygienic conditions.

### SIZING

After fumigation and washing, figs are put into sizing machine and calibrated according to their sizes.

### AFLATOXIN CONTROL

Before the packing process, figs are inspected under UV lights by the skilled and experienced staff specialised in aflatoxin control. The ones contaminated by aflatoxin or carrying risk for health are completely removed and destroyed.

### SELECTION

Finished figs are carefully and aesthetically packed by the experienced staff in different weight and packing types.

Onsite laboratory testing measures moisture and other contents.

## *Sun Dried Malatya Apricots*

The top quality apricots in the world are grown in Malatya region of Turkey. They are freshly harvested when ripe and then pitted traditionally to be dried under the sun.

Apricots are a very good source of Vitamin A, Vitamin E and Potassium. They are also very rich in fibers and minerals. They have great benefits for digestion system and hearth health.
